

# NEWS ALERT

## Make an Appointment to 'Meet' the Boiler Lizard® at NFMT!

Facility managers at hospitals, universities, and other commercial buildings have a lot to think about. While corrosion prevention should be on their mind, we don't want it to be a tough issue to face. That's why Cortec® corrosion solutions will be such an important contribution to the NFMT (National Facilities Management & Technology) conference expo in Baltimore this March.

In addition to sharing ideas for structural and electrical protection, Cortec® will focus on solutions to corrosion in boilers and cooling water systems used for comfort heating and cooling. As always, the popular [Boiler Lizard®](#) will have a prominent position as an established solution for effective boiler layout. A new highlight will be better seasonal startup of cooling water systems thanks to the [Cooling Loop Croc™](#).

NFMT will be a great opportunity to talk in person to our Cortec® team, including our resident water treatment expert, Scott Bryan, CWT, who knows the ins and outs of boiler and cooling system corrosion preventative maintenance. NFMT will also be an excellent time to mingle with the very facility managers and engineers in need of the corrosion solutions you can offer.

Save the date for NFMT and plan to meet us, the Boiler Lizard®, and many others in Baltimore to secure unparalleled benefits in corrosion protection of boilers and cooling systems. [Register now](#) and [let us know you're coming!](#)
