

# NEWS ALERT

## Visit Cortec® at NISTM to Learn about Corrosion Protection on ASTs!

Cortec® is looking forward to sharing CorroLogic® corrosion solutions at the NISTM 16<sup>th</sup> Annual National Aboveground Storage Tank (AST) Conference & Trade Show in The Woodlands, Texas!

With the 2021 release of [API Technical Report 655](#), "Vapor Corrosion Inhibitors for Storage Tanks," and this year's release of the [AMPP SP21474-2023](#) standard on "External Corrosion Control of On-Grade Carbon Steel Storage Tank Bottoms," now is a better time than ever to take a closer look at what Cortec® CorroLogic® can do to help mitigate corrosion underneath storage tanks.

The conference will provide two great ways for you to learn about [CorroLogic® Technology](#) and its advantages for corrosion protection on AST bottoms:

1. Come to the Cortec® booth and talk with one of our knowledgeable representatives, led by preservation expert Eric Uutala (Technical Sales & Product Manager – Asset Preservation and CorroLogic®).
2. Attend Eric's Wednesday afternoon presentation on "Preservation Strategies for AST Floors in All Phases: New Construction, In Service, and Out of Service."

In turn, our team is eager to hear from you about your biggest AST corrosion maintenance concerns so we can have a better understanding of how to help!

As always, this NISTM show is a great place to learn more about the many other technologies and tools for storage tank management in general and to make invaluable professional connections with others in the industry.
