Filling drums with VpCI®-369

Starting in January 2020, Cortecros® will also manufacture

VpCI®-325, VpCI®-377, VpCI®-377 W, VpCI®-379, VpCI®-418 LM, VpCI®-649, VpCI®-649 BD, and MCI®-2020.

CorteCros® laboratory

Production in Split facilitates shorter delivery time to customers everywhere within the European Union and nearby countries. CorteCros's new manufacturing facility and lab are equipped with modern instruments and perform testing compliant with EU and ASTM standards. Each batch is tested onsite according to stringent requirements that allow the company to provide high quality services to its customers. Cortec® is excited to begin this next phase of growth for increased production and improved service to customers across Europe!
