Obama Announces New Initiative To Strengthen U.S. BIO-BASED Manufacturing

On October 2nd, President Barack Obama announced BIO-BASED Materials as 1 of 3 emerging technologies for US competitiveness. One of the executive actions will include investing over \$300 million in emerging manufacturing technologies, specifically composites and bio-based materials, which will be equally matched by the private sector.

Cortec[®] Corporation has privately invested in this manufacturing technology for years, which has allowed the company to become the forerunning global leader in composite, bio-based, sustainable, environmentally friendly VpCI[®] and MCI[®] products. The investment announcement made by President Obama, has been a great reminder of the importance of the bio-based manufacturing sector to the American economy, as well as the awareness for environmentally safe product use.
