

# NEWS ALERT

## Cortec® Launches New Website for Packaging Solutions.

Cortec® Corporation is proud to announce the new packaging solutions web site-- [www.cortecpackaging.com](http://www.cortecpackaging.com). This site has a vibrant web design and a more user-friendly interface to help make information mining easier. It is designed to educate and assist customers seeking packaging solutions and resources to combat the effects of corrosion.

[www.CortecPackaging.com](http://www.CortecPackaging.com)

The site describes Cortec's technology, processes, applications, and markets served; it also includes access to over 300 case studies, test reports, and specifications. You can quickly explore applications by market and understand the technology behind Cortec® solutions. Information and resources will be frequently supplemented to continually enhance the knowledge and service provided to our customers.

"Our main goals in creating the site", says company President Boris Miksic, "is to make it easier for our customers to obtain up-to-date information on the latest capabilities; along with a broad overview of all the products and services available. The key for the design was that we get our message out there and to be information rich."

Cortec® Corporation is a world leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
