

NEWS ALERT

Welcoming the Newest Addition to Our Technical Service Team!

Our Cortec® Technical Service department has recently been undergoing a re-creation into a dynamic new team with fresh talent eager to serve and excel. We are therefore pleased to introduce our newest member: Patrick Shortridge, who came on board as a Technical Service Engineer in October. Patrick graduated in May 2020 with a B.E. degree in Chemical Engineering from the University of Minnesota Duluth and is looking forward to learning and growing as part of a team of corrosion problem-solving experts!

“Corrosion is not a topic that most ordinary people know very much about,” commented Patrick when asked what he finds most interesting about the field he finds himself in. “Despite this, it is prevalent virtually everywhere and can cost companies millions of dollars each year. I find it very interesting to investigate each customer’s application and the conditions they operate under, and then give a product recommendation. No two situations are ever the same!”

Patrick is eager to assist you with the best service possible to meet your corrosion needs in your specific applications. “Whenever I get a call or email from anyone with a question or problem, I want to be able to go above and beyond assisting them,” he shared.

Please join us in welcoming Patrick to the team, and feel free to contact him at any time with your questions!

Patrick Shortridge, Technical Service Engineer
Office: 651-429-1100 Ext. 1138
