Spill Kit 35S Featured In October Issue Of Pollution Engineering!

Bioremediation Product

Spill Kit 35S is an environmentally safe and economical alternative to the use of chemicals. It includes two applications for spills up to 10 square meters. It is designed to bring two of the best hydrocarbon degrading technologies into one to enhance the three steps of bioremediation. Each kit includes BIOSURF, a plant derived biosurfactant solution rich in nutrients that promotes bacterial

activation and solubilizes the hydrocarbons, and BCP 35S, a powder blend of beneficial and naturally occurring microorganisms (*Bacillus* and *Pseudomonas*) specialized to degrade hydrocarbons molecules.
