PRODUCT RELEASE

Bionetix® Improves Portable Toilet Appearance, Odor, and Ease of Pumping with Bluer, More Fragrant Natural Treatment!

Portable toilets have the reputation of being smelly, unsightly, and disgusting. To help remedy this problem and improve user experience, Bionetix® International has introduced a bluer, more fragrant version of a natural portable toilet deodorizer and cleaner!

PORTA-TREAT P PLUS is a safe, environmentally friendly solution for cleaning and deodorizing portable toilet retention tanks. Its water-soluble pouches are

easy to store and can be tossed into portable toilet tanks after routine emptying and cleaning without special measuring required. The safe, non-formaldehyde, non-bronopol formula has no adverse effects on sewage treatment plants.

Bacteria inside PORTA-TREAT P PLUS digest waste into a liquefied substance that is easier for maintenance crews to pump. This extends pump life and saves money in the long run for companies that service portable toilets. The digestive action of PORTA-TREAT P PLUS also reduces odor and creates a less offensive appearance of waste, further minimized by the extra blue color of Porta-Treat P Plus.

PORTA-TREAT P PLUS is quick acting and leaves behind a fresh cherry fragrance that is stronger than the standard PORTA-TREAT. It can be used to improve fragrance, appearance, and pumping ease in all types of portable toilet applications:

- Mobile systems
- Vehicles
- RVs
- Marine vessels
- Aircraft
- Public transportation

PORTA-TREAT P PLUS works through the mechanism of natural bioaugmentation, which actually degrades waste and eliminates odors instead of only masking them. Non-pathogenic microorganisms in PORTA-TREAT P PLUS release enzymes that break down greases, oils, undissolved soap residue, and paper into more digestible particles. The microorganisms consume these contaminants for energy and reproduction, releasing water and carbon dioxide as non-toxic byproducts.

PORTA-TREAT P PLUS is a simple, easy, and natural way to provide deodorizing and cleaning action with extra fragrance and improved appearance. One pail of PORTA-TREAT P PLUS supplies 300 pouches of 28 grams each, packed with microorganisms, biological nutrients, and stimulants. Bacteria count is 1 billion CFU per gram.

In addition to portable toilet treatment, Bionetix® carries an excellent portfolio of natural biological waste treatment solutions that accelerate degradation of specific industrial and municipal wastes on a large scale.

PORTA-TREAT P PLUS
PORTABLE TOILET TREATMENT

SPECIFICATIONS

Description:	Blue powder in water-soluble pouches
Packaging:	300x28g/pail or 40x28g/pail, 6/pail/case
Bulk Density:	1.05 -1.20 g/cm ³
Stability:	Max. loss of 1 log ₁₀
pH:	6.0-7.5
Bacteria Count:	1 billion CFU/g

Storage and Handling: Store in a cool, dry location. Do not inhale dust. Avoid contact with eyes. See SDS. Bionetix® will not be held responsible for quality issues after 6 months of storage.

PRODUCT DESCRIPTION

Porta-Treat P Plus contains bacteria that produce specific extracellular fast-acting enzymes that attack waste and its by-products at the molecular level. This action degrades organic wastes in toilets and holding tanks.

Porta-Treat P Plus is a quick acting treatment that deodorizes portable toilets and leaves only a fresh fragrance behind.

Porta-Treat P Plus contains a safe, non-formaldehyde formula that has no adverse effects on sewage treatment plants, leaving behind a deeper, blue odor and more fragrance than the regular Porta-Treat P.

APPLICATION

Apply one pouch after emptying and cleaning the retention tank.

For further information on application, contact your BIONETIX® technical representative.

TOSS IN THESE WATER SOLUBLE PACKAGES FOR CLEANING ACTION AND DEODORIZING POWER

BIOAUGMENTATION WITH PORTA-TREAT P PLUS CAN:

- Treat and deodorize portable toilets, holding tanks, and mobile systems aboard factories, RVs, motor vessels, aircraft, and public transportation.
- Treat odors, grease, oils, undissolved soap residues, and paper.
