## Cortec's User-Friendly Corrosion Solutions Stand Out at POWERGEN 2019

POWERGEN 2019, November 19<sup>th</sup>-20<sup>th</sup> in New Orleans, was an excellent time to share corrosion solutions with CEOs, engineers, field operation specialists, applications supervisors, and managers in the power generation industry and beyond. Many were eager to learn about the advantages of Cortec<sup>®</sup> coatings, VCI emitters, Boiler Lizards, and other Cortec<sup>®</sup> VpCI<sup>®</sup> corrosion solutions for the first time. Judy Wolf (Regional Sales Manager, Southern U.S.) noted, "They were very impressed with the fact that, in most applications, our Cortec<sup>®</sup> products do not need to be cleaned off before putting the protected piece into service."

In addition to standing apart by providing alternatives to traditional messy rust preventatives, Cortec<sup>®</sup> captured much attention, as usual, with its steel wool bottle demo showing Vapor phase Corrosion Inhibitor (VCI) Technology in action. Scott Bryan (Technical Sales Manager - Water Treatment) was able to share expert insights into the important aspect of industrial water treatment for power facilities; and together, Judy and Scott were able to reach out to attendees from across the U.S. and many countries including Canada, Mexico, Costa Rica, the Cayman Islands, Libya, South Korea, Turkey, Kazakhstan, Japan, and Saudi Arabia!

Cortec<sup>®</sup> Corporation is the global leader in innovative, environmentally responsible VpCI<sup>®</sup> and MCI<sup>®</sup> corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec<sup>®</sup> manufactures over 400 products distributed worldwide. ISO 9001 and ISO 14001 Certified, and ISO 17025 Accredited.
