## Ready for Hunting Season? Keeping Rifles Rust-Free

Fall is prime hunting season in much of the Northern Hemisphere. If you are a hunter, that means it's almost time to pull your shotguns and rifles out of the gun safe and prep them for an exciting season in pursuit of game. It also may be time to install a VpCI® Emitter—a favorite corrosion inhibiting device for those sportsmen and sportswomen who have discovered the ease of protecting firearms with [Cortec®](#) VpCI®—and take a fresh look at CLP options.

### Make Your Gun Safe a Rust-Free Zone

Even if a rifle is not cold and damp when it is put away, it may be vulnerable to corrosion due to fluctuating temperatures, humidity, and potential moisture condensation on metal parts in gun safes. Bull Frog® VpCI® Emitters release corrosion inhibiting vapors that diffuse throughout the gun safe and settle on all exposed metal surfaces (e.g., steel barrels and triggers) inside the enclosure, forming a protective molecular barrier that fights rust during the storage season.

### Bull Frog® VpCI® Emitters – Choose Your Style!

Although there aren't any blaze orange or camo options, hunters can choose from a variety of VpCI® Emitter styles when preparing their gun lockers for post-hunting storage. The [Bull Frog®](#) Rust Blocker Cup is a small self-adhesive cup that is easy to place on wall of the safe for protection of 11 cubic feet (0.31 m³) of space. For larger safes, simply hang a Bull Frog® Rust Blocker Shield inside.

**Keywords:** hunting season corrosion, how to keep rifles rust free, VpCI, Cortec, corrosion protection for hunters, best practices for gun storage, VpCI emitters, rust prevention, hunters corrosion, gun storage tips

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 and ISO 14001 certified.

## After the Hunt

In between hunts, or when the season is over, keep the inside and outside of your gun barrel rust-free with [VpCI® Super Penetrant](#) or [VpCI®-340 CLP](#). These products contain a combination of cleaning and rust preventive properties to help your gun be ready to use the next time you go into the woods.

## Ready for Rifle Rust Prevention?

If you already use VpCI® Emitters, don't forget to replace them every two years for best results. If you have not yet tried one, now is a good time to evaluate the effectiveness of last year's corrosion protection plan and consider whether a VpCI® cleaning and protection strategy is in order once hunting season is over. [Contact Cortec® for more information on these quick and easy solutions to fight corrosion in gun safes and on rifle barrels.](#)
