PRESS RELEASE

Non-Polluting Rust Remover Reduces Waste Disposal Problems

Remove Rust Safely While Adding Corrosion Protection!

Cortec's VpCl®-426 descaler/rust remover is a water-based, heavy duty rust remover available in liquid, powder, and gel form. Innovative and economical, this rust remover is designed to remove corrosion, scale and naturally occurring oxides from iron, carbon and stainless steel, copper, aluminum and magnesium/magnesium alloys.

VpCl®-426 is a powerful descaler/rust remover, yet much gentler than other chemicals on the market. It is excellent for household corrosion removal needs.

VpCI®-426 descaler/rust remover brightens magnesium and aluminum, leaving a shiny surface that provides long-term corrosion protection.

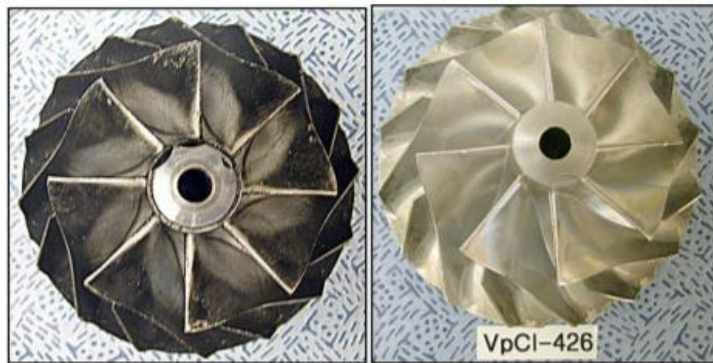

This non-polluting water-based liquid is also excellent at removing calcium carbonate and sulfate. The product is much safer than other rust removers on the market, making it ideal for household tasks. VpCI®-426 descaler/rust remover gel stays in place on vertical and difficult to treat surfaces where corrosion is heavy, allowing extra time for VpCI®-426 to remove

corrosion from the metal surface. This nitrite free rust remover has increased performance over equivalent products while significantly reducing costs of surface preparation. It can be used in areas that cannot be sandblasted or cleaned with power tools.

TYPICAL USES/FEATURES

- Rust remover for ferrous metals
- Preparation of aluminum surfaces before anodizing, painting, and electroplating
- Oxide removal on brass, bronze, copper, zinc, magnesium, and magnesium alloys
- Brightener for aluminum and copper
- Scale build-up remover from bathroom tubs, showers, and pipes
- Household corrosion removal needs
- NSN 6850-01-477-4155

Before application
