NEWS RELEASE

**Struggling with scale formation?
Take control with Cortec®!**

Cortec's S-14 RO is a multifunctional antiscalant for reverse osmosis systems, and is highly effective in preventing calcium carbonate scale formation on membrane surfaces. Besides containing calcium carbonate scale inhibition properties, S-14 RO is effective in controlling calcium sulfate, calcium fluoride, and metal oxides scale formation. It has compatibility approvals from membrane manufacturers.

All ingredients in S-14 RO are certified to ANSI/NSF standard 60 for use in reverse osmosis systems producing potable water. S-14 RO is not affected by chlorine or other oxidizing biocides under normal conditions of use, and should be injected in membrane systems after chlorine and sodium metabisulphite treatment.

Cortec® Corporation's S-14 RO is highly effective in preventing calcium carbonate scale formation on membrane surfaces.

S-14 RO is miscible with water and should be dosed continuously and proportionately to the feed water flow to maintain the recommended dosage level. The dosage level required is dependent on the quality of the feed water and the saturation indices of the various scale forming species present in the concentrated brine.

Cortec® Corporation is a world leader in innovative, environmentally responsible VpCI™ and MCI® corrosion control technologies for Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Our relentless dedication to sustainability, quality, service, and support is unmatched in the industry. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
