

NEWS ALERT

Corrosion Cops Feature MCI® at SEAOH Convention

Cortec® distributor Corrosion Cops has been in the rust and corrosion protection business since 1992. They recently represented Cortec® MCI® at the SEAOH (Structural Engineers Association of Hawaii) Convention, August 14th-15th at the Aulani resort in Hawaii.

When it came time for the conference’s two minute “Exhibitor Drill” presentations, Linda Moran of Corrosion Cops chose to highlight Cortec® MCI®. She mentioned the benefits of its organic mixed inhibitor technology that provides both anodic and cathodic protection against corrosion in reinforced concrete.

After the presentation, an important MCI® customer came up to Moran to offer additional feedback for use in future presentations. He commented that the two main reasons his company likes to use MCI® admixtures over other brands is because of its fixed dosage rate and its non-set-accelerating admixtures. The latter is especially important for users in Hawaii because of the climate.

Cortec® applauds Corrosion Cops for their efforts at SEAOH and appreciates the spontaneous feedback of MCI® users as they both work together to enhance reinforced concrete durability in the corrosive Pacific environment.

MIGRATING CORROSION INHIBITORS
FROM GREY TO GREEN

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 and ISO 14001 Certified, and ISO 17025 Accredited.
