

Got a corrosion headache? Take a pill!

Even though your first connection to pills was probably some sort of medical treatment, Cortec® is about to change this trend. Cortec's expert team of chemists and engineers launched a revolutionary 'anti-corrosion' pill called Cor-Pak® Tablets – the best cure to all corrosion diseases.

By using this little, super-economical yet strong preventative, conventional expensive methods of applying and removing coatings can now be eliminated forever.

Cor-Pak Tablets provide an extremely efficient dry method of protecting metals within a package. Using Vapor phase Corrosion Inhibitor (VpCI®) technology, these easy-to-use tablets provide more than two years of premium multi-metal corrosion protection. Just a few tablets need to be dropped into a bag, box, or package.

Cor-Pak Tablets powered by Nano-VpCI are nitrite, phosphate, and silicate free, making them safe to use and apply.

After the VpCI vaporises, it will attach to all metal surfaces, reaching even recessed areas. The protective monomolecular layer does not need to be

The Cor-Pak Tablets can cure your corrosion headaches.

removed prior to processing or operation. If opening the package disturbs the layer, it will be replenished by continuous vapor protection upon reclosing. The VpCI layer does not interfere with the operation of electrical and electronic components.

Cor-Pak Tablets are designed to protect products, components, or assemblies when packaged in corrugated boxes, plastic wrap or bags, and metal, plastic, or wood containers. They will also protect from salt water during overseas transport. Protected parts can be used immediately.

Cor-Pak Tablets will protect up to 7.1 L of enclosed space per tablet. They are easily inserted in packaging by manual or automated systems. No spraying,

wiping, dipping, surface preparation, or regeneration is required.

Some additional applications are:

- Completed assemblies, parts, and components
- Sensitive electrical, electronic equipment, and controls
- Marine and commercial electronic equipment
- Interior of lighting fixtures
- Motors and mechanical controls
- Tools, spare parts, and components
- Nuts, bolts, nails, screws, and fasteners

Cor-Pak® Tablets conform to NACE Standard TM 0208-2008, MIL-I-22110C, and are RoHS compliant. **P**

This product is available through Savcor Products Australia in Australia and New Zealand. For more information please contact your local Savcor Products representative on **1800 SAVCOR**.
