Video Conference with Cortec®!

Utilizing the latest media technology, Cortec® Corporation is able to Video Conference from all it's facilities.

Interest in video conferencing has been growing in the past five years and Cortec® has added this communication tool. this new tool allows Cortec® to effectively share important information, valuable insights and manage business with greater convenience and effectiveness than ever before.

Converting a telephone discussion into a video conference can often improve the effectiveness of a meeting by increasing impact and focus. Another major role of video conferencing, is being a substitute for business travel. The cost of travel and long security delays have been enough for many to turn to visual collaboration as an alternative to business travel.

In short, video conferencing:

- Reduces travel costs
- Increases productivity
- Can involve multiple sites simultaneously
- Allows many people to interactively participate
- Provides access to training

If you have video conferencing capabilities and would like to explore the possibility of communicating with Cortec® through this medium, please contact us for set-up. Cortec® Corporation would like to make distant communications as natural and interactive as attending in person.

Cortec® Corporation is a pioneer of environmentally friendly, corrosion protection Vapor phase Corrosion Inhibitors (VpCI™) & Migratory Corrosion Inhibitors (MCI®) technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas and other industries.
