PRODUCT NEWS RELEASE

Unbeatable Corrosion Protection While Protecting the Planet!

VpCI™-148 Grease Resistant Paper is Cortec's amazing new corrosion inhibiting paper for ferrous and non-ferrous materials. This astonishing product is resistant to solvents, greases, and oils; and protects dry or oiled metals during storage, transit, and overseas shipments.

VpCI™-148 Grease Resistant Paper combines multi-metal corrosion protection, barrier properties, and packaging all in one step, eliminating the need to inventory other papers. Unlike wax or polycoated papers, which create hazardous waste, VpCI™-148 Grease Resistant Paper contains a biobased coating, is biodegradable, and fully recyclable/repulpable.

VpCI™-148 is a cost effective way to provide unbeatable corrosion protection while still protecting the planet.
