PRODUCT NEWS RELEASE

Second to None in the World of Corrosion Protection!

Cortec® Corporation's new VpCI™-149 is an exceptional corrosion inhibiting paper for the protection of a wide variety of metals. Formulated specifically to provide superior protection for sensitive metals such as copper, aluminum, and cast iron; VpCI™-149 is an excellent choice for all packaging needs.

Manufactured using a neutral, natural kraft paper, the coating provides a very soft and conformable feel, making it easy to use when wrapping parts individually. The strong vapor phase provides protection for interleaving and void spaces, and because it is not a saturated paper, it will not tear.

Formulated to provide extra protection for sensitive metals such as copper, aluminum, and cast iron, VpCI™-149 is an excellent product for all packaging needs.
