PRODUCT RELEASE

Cortec's VpCI®-329 D Now Available In Easy Spray Formula - Convenient Corrosion Protection For Your Assets!

VpCI®-329 D ES is a new easy spray version of VpCI®-329 D. While VpCI®-329 D provides excellent rust prevention for metals in indoor and outdoor sheltered conditions, its oil-based carrier makes it difficult to spray. VpCI®-329 D ES allows VpCI®-329 D be easily sprayed from a handheld trigger spray bottle. It offers a convenient way to protect gears, spindles, coils, or any other metal parts that require a light coat of oil for further processing and shipment.

VpCI®-329 D ES contains the same innovative Vapor phase Corrosion Inhibitors (VpCI®) technology as VpCI®-329 D; its carrier is a combination of bio-based oil and mineral spirit.

VpCI®-329 D ES attacks corrosion on two fronts. Its oil-soluble corrosion inhibitors first create a tenacious film that clings to metal surfaces, providing excellent contact corrosion protection. VpCIs also release into the air and attach electrochemically to the metal surface. The coating performs effectively even under the adverse conditions of 100% relative humidity and in the presence of such corrosive species as chlorides, hydrogen sulfide, or other sulfur compounds.

VpCI®-329 D ES contains no hazardous chromates, nitrites, or phosphate inhibitors. It is thermally stable, providing long-lasting contact and vapor phase corrosion protection for a wider variety of applications.

You can find more information about Cortec's VpCI®-329 D ES here:
