PRODUCT NEWS RELEASE

Cortec® Corporation Introduces It's Newest Corrosion Fighting Cleaner/Degreaser.

Cortec® Corporation's VpCI™-418LM is a non-foaming, heavy-duty alkaline cleaner/degreaser for cleaning industrial, oil field, commercial, marine equipment, and parts. VpCI™-418LM contains Vapor phase Corrosion Inhibitors (VpCI™) to protect metal parts from corrosion after cleaning. VpCI™-418LM has a unique ability to remove difficult deposits such as heavy hydrocarbons, greases, drawing and buffing compounds, as well as mill and machinery oils.

VpCI™-418LM is designed for use in power washing machinery, high agitation parts washers, and high-pressure spray washers. VpCI™-418LM is nitrite-free, non-toxic, silicate free, and does not present disposal problems associated with most phosphate cleaners. VpCI™-418LM leaves no residual film and will not affect paint adhesion qualities.

VpCI™-418LM is designed for use in power washing machinery, high agitation parts washers, and high-pressure spray washers.
