### **PRODUCT NEWS RELEASE**

## **Clean and Protect Your Metals and the Environment with Cortec® Corporation's VpCI™-429.**

It is necessary to not only erase rust from our metals, but to prevent it from ever returning as well. To solve this problem, Cortec® Corporation has created VpCI™-429; an effective means of rust removal, cleaning, and prevention. With many ideal characteristics, including a completely neutral pH and environmentally friendly chemistry, VpCI™-429 is perfect for cleaning and protecting the metals we use every day.

This ground breaking product is unique in that, it removes rust and protects the cleaned surface up to 4 weeks. With no need for neutralization or additional rust preventative measures, surfaces can be painted without any additional preparation. In most cases, VpCI™-429 even acts as an adhesion promoter for coatings.

Many other cleaners/rust removers promote bacteria growth in cleaning systems; VpCI™-429 does not support bacteria growth, but works as a biocide potentiator - increasing the efficiency of biocides. VpCI™-429 is 100% biodegradable and completely non-hazardous.
