

NEWS ALERT

You Can Help Bearings Manufacturers Meet Bulk Corrosion Protection at a Discount!

Although corrosion protection may not be the top priority for many industries simply struggling to carry on amid pandemic challenges, it is still critical, especially for bearings manufacturers and suppliers. Highly polished bearing surfaces are more vulnerable to corrosion, and one of the last things plant managers want to deal with right now is a customer rust claim. They are also likely to welcome any new ways to cut costs on basic tasks. You can help them by ordering CorShield® VpCI®-146 Paper in bulk cradle packs and introducing them to one of the simplest and most cost-effective forms of corrosion protection at a discount!

CorShield® VpCI®-146 is a USDA Certified Biobased Product that is already competitively priced, so it is a great way to add that extra layer of corrosion protection to bearings before shipping them out the door. Employees can just wrap and pack, wrap and pack, wrap and pack until all the bearings have come down the line for the day. They do not even have to worry about which side of the paper is facing the bearings, since CorShield® VpCI®-146 Paper offers corrosion protection on both sides.

Ordering the paper in bulk cradle packs is even better for large-scale bearings producers, not only because they need a lot of corrosion protection, but also because they can get a discount by reducing material and labor costs. This is because cradle packs use just enough packaging material to cradle and stack the rolls instead of requiring 35-42 cardboard boxes to pack each individual roll – not to mention the labor time needed to do so. On the user's end, this also means less cardboard to jam the recycling bin.

Bulk cradle packs of CorShield® VpCI®-146 Paper have many great benefits for the user and the environment. Most importantly, they give the user a convenient method of corrosion protection. Not far behind are the benefits of saving money, time, and material resources so users can be economically and environmentally responsible.

Contact Cortec® Customer Service for more pricing and size details on your next order of CorShield® VpCI®-146 Paper in bulk cradle packs: <https://www.cortecvci.com/contact-us/>.
