

NEWS ALERT

Short Video Shows Convenience of Cortec® VCI Paper Perforated on a Roll

A picture is worth a thousand words. That's why our CorShield® VpCI®-146 perforated paper video is a great tool to share with customers and users of VCI paper!

In half a minute, the video shows how easy it is to dispense pre-sized sheets of CorShield® VpCI®-146 Paper off a perforated roll. Simply unroll the paper, tear it off at the perforation line, and wrap the metal part that needs corrosion protection. This option is great for end users who want to dispense corrosion inhibitor paper on a roll but don't want the hassle or guesswork of cutting it with a utility knife.

Cortec® has a wide variety of custom perforation sizes available, ranging from 12-48 inches (30.5-122 cm) wide and 24-72 inches (61-183 cm) long to fit different rust preventative packaging needs—from wrapping small parts to lining pallets. Cortec® also keeps in-stock rolls of CorShield® VpCI®-146 Paper perforated at 12 x 12 inches (30.5 x 30.5 cm) for speedy turnaround.

Watch our CorShield® VpCI®-146 perforated paper video to see how convenient VCI perfed paper is and spread the word! https://www.youtube.com/watch?v=l-CahyX_UnE
