

## Members of Cortec® European Group at the Largest Scientific Corrosion Event Ever Held in Europe!

The annual conference of the European Federation of Corrosion, EUROCORR, is a flagship event in the field of European corrosion science. Uniquely in 2017, it was co-organized by the International Corrosion Council and Center for Chemical Process Safety becoming thus the largest scientific corrosion event ever held in Europe. Beautiful city of Prague was this year's host of this renown conference. All European members of Cortec® Corporation – Cortec® Europe, EcoCortec® and CorteCros® were present at our joint booth.

**Ivana Radic VP of sales Europe and Ana Juraga, Marketing Manager for Europe were busy at Cortec's booth**

People from various industry fields expressed huge interest in Cortec's technology. Cortec's booth was among the busiest at trade show and we are thrilled to acknowledge that this was one of the most successful EuroCorr conferences so far. Cortec® Corporation with its partners also presented three research papers at the Symposium. Excellent design of Prague Congress Centre enabled a large-scale exhibition to be in close contact with the participants. Rich social program was carefully prepared to enhance further the exchange of information between the attendees.

# NEWS ALERT

**Ivana giving a presentation on Cortec's latest research paper covering Biobased Anti-Corrosion Coatings.**

Ivana Radic Borsic presented a research paper named “Economic and Environmental Impact of Traditional Rust Preventives as Compared to Novel Biobased Temporary Coatings“. The paper demonstrates advantages of biobased coatings vs traditional petroleum derived rust preventives. The lesson was fully attended and generated a huge interest from the audience. Cortec's long time partner professor Behzad Bavarian from California State University also gave two excellently received lectures on Cortec's technology.

The congress covered all aspects of corrosion science, engineering and material protection with world-wide reach. Companies, scientists and representatives of research institutions and industry came together, exchanged valuable information and created new business opportunities.

**Cortec® is especially proud for its extensive collaboration with various scientific institutions. Professor Bavarian one of the biggest professionals in the corrosion protection field presented two papers on VpCl/MCI technology.**

Cortec® once again demonstrated its leadership in technical innovation and excellent collaboration with scientific institutions. Through years we have been committed to research and development with the goal to produce the best and safest corrosion protection solutions in the world. Today we are proud to have reached this goal and continue this successful path.
