

New VpCI® Foam Fabrication at EcoCortec!

In EcoCortec® plant we are continuing our expansion which includes acquiring new equipment and expanding our product offerings. We are excited that our plants is now able to offer stock sizes of foam sheets VpCI 130 series as well as custom sizes foam sheets. Brand new foam fabricating machine was installed last week in EcoCortec plant with help of our Cortec® team. New foam fabricator will enable us to offer smaller quantities to our clients and lead time for our European customers will be much shorter. With this new foam fabricating machine we can also produce BioPad in stock and custom sizes.

v

VpCI® 132 foam sheet is about to be cut to custom size in EcoCortec plant.

For this occasion, Caleb Pheneger, Ch. E Director of Manufacturing from Cortec® world headquarters plant, visited Croatia and Beli Manastir. He put a new foam fabricator in operation and held a training for our team in the plant. His knowledge and experience will be of great help when operating on this machine in the the future.

New foam converter in Croatian plant will enable shorter delivery time for our European customers. They will be able to receive their custom and stock sizes of foam sheets and Biopad in record time.
