EcoCortec EuroCovers

EcoCortec EuroCovers Ready for Just-In-Time Deliveries!

EcoCortec of Beli Manastir Croatia is pleased to announce the introduction of stock EuroCovers making palletizing and bundling a one person job, reducing labor and time costs by up to 75% compared to stretch wrapping. EuroCovers from EcoCortec are properly sized for Euro Pallets so there is no wasted plastic, no excessive taping and stretch wrapping can be reduced or completely eliminated. Best of all, EcoCortec EuroCovers are in stock and ready for immediate shipment throughout Europe.

Standard EuroCovers are made from a proprietary blend of high strength plastic resins and extruded on state-of-the-art blown film extrusion line to ensure absolute quality control. EuroCovers are also available with Vapor phase Corrosion Inhibiting (VpCI) technology to prevent damage to metal from corrosion and even in globally certified biodegradable versions.
