NEWS ALERT

RoHS and SGS Reports Now Available for Key Cortec® Products!

January 26, 2007

Cortec® is pleased to announce that 19 of our key corrosion-inhibiting products typically used in electronics industries now have SGS Reports available. Many Cortec® customers that produce electronics are subject to RoHS regulations which primarily relate to lead and other environmentally restricted substances. The SGS Reports now available from Cortec® help customers using our produccts meet the RoHS documentation requirements, typically without further need to have the products tested agian.

Cortec® products that have SGS Reports available in English and Chinese:
