PRESS RELEASE

Cortec® Offers Rapid-Response Shipping on More than 240 SKUs!

Cortec® Corporation is pleased to now officially offer rapid response, same-day shipping for most of its standard VpCI® and MCI® products. While other corrosion inhibitor companies may provide same-day shipping on select metals preservation products in small quantities, Cortec's rapid response shipping covers more than 240 different SKUs! Customers simply need to submit their orders before noon (CT) and request same-day shipping on any of Cortec's stock items!*

Cortec® already has an outstanding track record of rapid turnaround, often beating its own three-day lead time for shipping products from Cortec® World Headquarters in Saint Paul, Minnesota. This nimble response is rippling out to Cortec's VCI paper and film plants, which have seen significant advancements in shipping turnaround in just the last year. The shipping and receiving office at Cortec® Coated Products

(CCP) in Eau Claire, Wisconsin, now has extended hours and is open from 8:00 a.m. to 5:00 p.m., five days a week for increased availability to Cortec® customers. Concerted efforts to serve its VCI film customers better at Cortec® Advanced Films (CAF) in Cambridge, Minnesota, have empowered Cortec® to recently double the number of VpCI® film shipments out the door in 24 hours or less.

Customers are a priority at Cortec®. The company wants to serve them quickly and efficiently, so they can get the rust and corrosion solutions they need, when they need them. Thanks to Cortec's excellent shipping record and ongoing improvement, the company is happy to be able to provide customers with rapid response shipping on hundreds of stock corrosion solutions for packaging, concrete durability, water treatment, MRO, and beyond!

To place your order, please contact our Cortec® Customer Service:

[http://corteccustomerservice.com/meet-our-team/!](http://corteccustomerservice.com/meet-our-team/)

** Available in U.S. only. Please allow extra time for hazardous shipments, very large orders, or other delays that may arise from time to time. Due to outside freight schedules beyond Cortec's control, orders received after noon will typically ship the next day but within 24 hours.*
